DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I and species in the reply filed on 10/9/07 is acknowledged. No arguments were made with the traversal.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Majoral et al. (EP 2801592).

Majoral discloses a support comprising at least one surface covalently functionalized with phosphorous dendrimers having a central core of formula IIIa; an intermediate layer consisting of formula I, where M is an aromatic group and R2 is an alkyl; and an external layer of formula II, where W represents alkyl and X is an amine or aldehyde. (see page 8, claims pages 27-28, Figure 1).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite because the phrase "capable of" is unclear. It is unclear whether the functions actually do allow the binding of the dendrimers to the surface, because the capability is not the same thing as actually performing the function. A positive recitation is required.

Claims 15 and 16 provides for the use of a solid support functionalized with a phosphorous dendrimer, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 15 and 16 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
